Nuclear Safety Regulation System

Nuclear Regulation Authority

The Secretariat of the Nuclear Regulation Authority

Secretary-General

Deputy Secretary-General

Deputy Secretary-General for Technical Affairs

Director-General for Emergency Response

Director-General for Radiation Protection Strategy and Security

Director-Generals (3)

Director, Division of Budget and Accounting

Director, Division of Legal Affairs

Director, Division of Oversight (3)

Director, Division of Nuclear Security

Director, Division of Regulation for Radiation

Regulatory Standard and Research Department

Regulatory Standard and Research Division

Divisions of Research (4) *1

Radio Protection Policy Planning Division

Radiation Monitoring Division

Nuclear Fuel Safety Policy Planning Division

Radiation Monitoring Division

FUD

Nuclear Fuel Safety Policy Planning Division

Radiation Monitoring Division

Councils, etc.

Reactor Safety Examination Committee

Radiation Council

Nuclear Fuel Safety Examination Committee

Commission on Evaluation of Incorporated Administrative Agencies

To develop human resources for nuclear safety

To plan and implement training programs for career paths

To address and deliberate the issues concerning nuclear reactor safety

To deliberate the technical criteria concerning prevention of radiation hazards

To address and deliberate the issues concerning the safety of nuclear fuel materials

To evaluate activities of the former Japan Nuclear Energy Safety Organization

The Secretariat of the Nuclear Regulation Authority

Director-General for Emergency Response

Director-General for Radiation Protection Strategy and Security

Director-General for Radiation Protection Strategy and Security

Director-General for Radiation Protection Strategy and Security

NRA Human Resource Development Center

Regional Organizations

NRA Regional Offices (22)

Rokkasho Safeguards Center

Nuclear Vessel Monitoring Center

National Research Development Co.

Japan Atomic Energy Agency (JAEA)

National Institutes for Quantum and Radiological Science and Technology (QST)

To develop human resources for nuclear safety

To plan and implement training programs for career paths

To address and deliberate the issues concerning nuclear reactor safety

To deliberate the technical criteria concerning prevention of radiation hazards

To address and deliberate the issues concerning the safety of nuclear fuel materials

To evaluate activities of the former Japan Nuclear Energy Safety Organization

General Affairs Section

Personnel Division

<Review Group>

Director, Division of Licensing (4) *2

Director, Division of Oversight (3) *3

<Inspection Group>

Oversight Planning and Coordination Division

Director, Division of Oversight (3) *3

Regional Administrators

To provide information to local governments and relevant organizations

Nuclear power operation inspector, nuclear disaster prevention officer, senior radiation disaster prevention experts etc. are arranged near nuclear facilities

To implement nuclear regulatory activities pursuant to the Nuclear Regulation Act

©JAERO

*1 System safety research, severe accident research, nuclear fuel waste research, earthquake and tsunami research

*2 Practical reactor inspection, research furnace inspection, nuclear fuel facility review, earthquake tsunami assessment

*3 Practical reactor monitoring, special inspection, monitoring of nuclear fuel facilities, etc.
